#01-SPAIN: THE COUNTRY & ITS CITIZENS

Spain is the largest tourist destination in Europe. A one-time (1939-75) military dictator defined the country with words that Spaniards hated. Spain is different. After a devastating civil war (1936-39) that he had started leaving the country impoverished and more than a million dead or in exile, the dictator aimed at attracting American tourists and easy dollars. Was Spain different then? Is Spain different now? This course will provide a bird's-eye view of the Spanish land and of its people. Subjects will include the Basque country, Barcelona, mountains, Celtic Spain, Castilians, Iberians, immigration, religions, art, and architecture. Is the afternoon siesta a tradition? Don't feel shy to ask questions. **Pilar Barkley**

#02-THE GOOD LIFE-PART TWO

In past offerings we have examined the question of "EVIL" in great detail. But now what about the "GOOD" which is the other side of the coin? In this second offering on the "Good" we will reflect on how our civilization has defined the "Good Life". As Aristotle said 2500 years ago "all humans desire happiness" through a good life fully lived. Note: There is no need to have taken part I in order to enjoy this second part of the course. .

As a grace note to this workshop, we introduce the work of The Globe & Mail's Stephanie Nolan in "Shakespeare's Face" involving an oil portrait of the man from Stratford held in Ottawa. #12-MAD SCIENTISTS – 21st Century Edition

There are some ideas that are so radical that if they were to work the implications could be revolutionary. Two previous presentations covered most of the 20th century, up to GPS and the Internet. This edition will examine some recent unlikely ideas which worked/failed, or are still being worked on; and possibly a few ideas from the past which time did not permit coverage of in previous editions. **Dave Holford**

#25-THE LOYALISTS: LIES, LEGENDS, AND LEVITY

The Making of a Tradition "The Loyalists of the American Revolution", lamented historian W.H. Nelson, "suffered a most abject kind of fate, losing not only their argument, their war, and their place in American society, but even their proper place in history." For the past two centuries and more, Canadians of Loyalist descent and persuasion have sought to remedy this oversight and vilification. They lovingly portrayed their Loyalist forebears in an exuberantly heroic light from pulpit and podium, with pen and press, and in prose and poetry. Their patriotic efforts not only brought forth our own legends and not a little levity, but have also underscored in no small measure much of early English Canadian nationalism. **Murray Barkley**
